Q.2 Simulate a shared Zomato recipe folder: create a directory called ZomatoRecipes and add a file recipe.txt inside it. Change the permissions so that everyone can read and write the file, but only you can delete it. Hint: Use the chmod command for permissions and the sticky bit for delete protection.

Q.5 A friend sent you a folder called MyntraOffers with files inside, but you can't open any of them. Use the chmod and chown commands to fix the permissions and ownership so that you (and only you) can access and modify all files in the folder. Hint: Use the -R flag to apply changes recursively.
